

TECHNICAL DATA SHEET

TOPS PA-7257

TOPS PA-7257 is a pure-acrylic polymers, excellent cost-performance attributes for architectural coatings applications. It is a special type for improve color retention, pigment dispersion, gloss, scrub resistance, good hiding power and very good to protect dirt pick up.

1. APPLICATION

TOPS PA-7257 is perfectly suitable for high quality interior and exterior paint.

2. GENERAL PROPERTIES

Total Solid Content (%)	:	49 to 51 %
Viscosity at 30°C	:	500 to 1,500 cps.
pH Value	:	7.0 to 8.0
MFFT	:	+21 ° C
Tg	:	+28 ° C
Specific gravity	:	1.080
Mechanical Stability	:	good
Appearance	:	milky, white emulsion.
Particle size	:	0.140 – 0.170 micron

3. STORAGE AND HANDLING

To ensure maximum stability and maintain optimum binder handling properties, binder should be stored in warehouse, away from heat sources and sunlight .The temperature of glue not over 40 degree C.
