

TECHNICAL DATA SHEET

TOPS SA-5007

TOPS SA-5007 is a new type waterborne dispersion of styrene-acrylic copolymer designed to provide excellent scrub, water resistance, alkaline resistant.

1. APPLICATION

TOPS SA-5007 is suitable for high quality primer and interior paint that can formulate to sealant and elastomeric paint

ADVANTAGES

- Good adhesion to various substrates.
- Good water resistance property.
- Very good alkaline resistance.
- Very good scrub resistance.

GENERAL PROPERTIES

Solid Content (%)	:	49 to 51 %
Viscosity at 30°C	:	4,000 to 8,000 cps.
pH Value	:	7.5 - 8.5
Tg	:	- 12 ° C
MFFT	:	0 ° C
Specific gravity	:	1.045
Mechanical Stability	:	good
Appearance	:	milky white emulsion.

STORAGE AND HANDLING

To ensure maximum stability and maintain optimum binder handling properties, binder should be stored in warehouse, away from heat sources and sunlight .The temperature of glue not over 40 degree C.
