

# TECHNICAL DATA SHEET

## TOPS SA-5781

**TOPS SA-5781** is a styrene acrylic emulsion. **TOPS SA-5781** is a milky white, medium-viscous liquid that dries to a clear film and high water resistance. It is a special water base, non-toxic and non-corrosive.

### 1. APPLICATION :

**TOPS SA-5781** is designed for modifying cement to give an excellent flexible film and very good cement stability.

### 2. SPECIFICATION :

Solid Content(%)	:	56 to 58 %
Viscosity at 30°C	:	500 to 1,200 cps.
pH Value	:	7.0 to 8.0
Density at 30°C	:	1.1 kg/L
Storage Stability	:	good
Mechanical Stability	:	good
Appearance	:	Milky white Emulsion

### 3. PACKING

- Packing in steel drum.
- Net weight = 200 kg/Drum

### 4. STORAGE AND HANDLING

To ensure maximum stability and maintain optimum glue handling properties, binder should be stored in warehouse, away from heat sources and sunlight .The temperature of glue not over 40 degree C.
