TECHNICAL DATA SHEET

TOPS TA-11L

TOPS TA-11L is a pure acrylic dispersion, soft film and self-crosslink polymer.

It is specifically designed for the finish of synthetic fibers and bonding for nonwovens.

ADVANTAGES

- Non formaldehyde.
- APEO surfactant-Free.
- Good water resistance properties.
- Good flexibility film properties

SPECIFICATION

Solid Content (EN 827)	:	49 - 51 %
Viscosity/30 ° C	:	< 300 cps.
pH Value	:	5.0 - 7.0
Tg	:	- 11 ° C
Mechanical Stability	:	good
Appearance	:	milky white

PACKING

- Packing in plastic IBC tank.
- Net weight = 1,000 kg/IBC

STORAGE AND HANDLING

To ensure maximum stability and maintain optimum binder handling properties, binder should be stored in warehouse, away from heat sources and sunlight .The temperature of glue not over 40 degree C.
