TECHNICAL DATA SHEET

TOPS TC 238

TOPS TC 238 is a waterborne polyvinylacetate homopolymer stabilized by means of polyvinylalcohol.

TOPS TC 238 has compatibility with pigments, fillers, and other additives.

Dispersion Properties

Appearance	white viscous emulsion
Polymer Type	PVAc
Emulsifying System	Polyvinylalcohol
Brookfield viscosity (RVT spindle 6 # 5 rpm; 25 °C)	80,000 – 100,000 cps
Total Solids Content	30.0 - 32.0 %
pH	4.0 – 6.0

Film Properties

Appearance	semi transparent
Surface	Not tacky

Applications

TOPS TC 238 is used for the formulation of paper packaging and wood adhesives.
