

TECHNICAL DATA SHEET

TOPS FRP-700

Chemical Description : Pure Acrylic copolymer

Characteristics: Flame retardant emulsion polymer

Typical Properties

Appearance	Milky, white emulsion
Polymer Type	Acrylic
Emulsifying System	Anionic
Brookfield viscosity (RVT #4/20 rpm; 27 °C)	max. 1,500 cps
Total Solids Content	51.0 - 53.0 %
pH	7.0 - 9.0
MFFT	27 °C

Film Properties

Appearance	Clear, transparent
Surface	Non tacky

Storage

The shelf life is 12 months in shade off the sun at a temperature from +5°C to +40 °C.
