

TOPS TK-55

TOPS TK-55 is a colloidal solution of sodium polyacrylate. This polyacrylate thickener is especially suitable for formulations based on carboxylated SBR, SBR latex, natural rubber latex and neoprene latex.

TOPS TK-55 is not suitable for formulations where the total solids content is less than 40%.

TOPS TK-55 is APEO free.

Dosage : 1 - 3 % on total formulation that depend on level of viscosity requirement & compound type.

Typical Properties

Appearance	Clear to yellow viscous liquid
Polymer Type	Sodium Polyacrylate
Emulsifying System	Nonionic
Brookfield viscosity (RVT # 5/20 rpm 27 °C)	3,000 – 5,000 mPas
Total Solids Content	12.0 +/- 1.0 %
pH	7.0 – 8.0
